dbt Learn, Group Training

*Note: for purposes of this dbt Learn, Group Training Description, Subcontractor acts as "dbt Labs" (also referred to as "we" and "us") and references to "you" and "your" refer to the End-Client.

Service Description: Getting Started

Set up
The technical instructor will set up a dbt Cloud sandbox project and Snowflake credentials for each training participant.

Training Sessions
1. The Group Training engagement will be completed in a 2-week period. The exact days of the week are flexible, but follows with 1 hour of learner setup and 2 two hour training sessions per week. This can be completed anytime during the two weeks.
2. During the 4 training sessions, a team of up to fifteen developers from Client will build out the foundation of a sandbox dbt project with live coaching from a Technical Instructor.
3. The following content is covered during the training sessions:
   a. Introduction to SQL
   b. Introduction to Git
   c. Introduction to Data Platforms and Cloud Environments
   d. Data modeling
   e. dbt sources
   f. Data testing
   g. Documentation
   h. Deployment
4. At the end of the course materials, developers can take a quiz and earn the dbt Fundamentals badge.
